Education

TSU Desarrollo de Software Multiplataforma ago 2020
Universidad Tecnológica de León
My skills encompass the ability to comprehensively analyze and model information systems requirements. I have developed applications on various platforms, including desktop applications, web solutions and mobile applications. In addition, I have experience in software test planning and execution, as well as effective database management. I am adept at implementing international standards in software development and I am always ready to adapt myself to the new demands of a globalized world in constant evolution.
